IS9100**APPLICATION**

Drive IS9100 is an electromechanical swing door operator for single or double leaf doors.

It can be installed both on new and existing doors. It can be operated in 2 modes:

- automatic swing door operator mode (i.e. opening after a pulse generated by motion sensor or pushbutton),
- manual opening mode (i.e. the device is used as a traditional door closer).

Drive is equipped either with a sliding arm for the installation on pull side or with a standard arm for the installation on push side with lintel depth of 225 mm maximum.

An integrated internal selector allows to easily set 4 different functions:

- Off;
- Automatic;
- Permanent opening;
- Exit only.

In case of power failure, the device works like a simple door closer.

With the manual opening mode, the function "power assist" allows to make the opening more comfortable.

Technical drawings available in the instruction manual.

LOCKS FOR ARMOURED DOORS

x1R Smart

x1R Smart is a motorised electronic lock specifically designed for security doors. It combines the solidity of a mechanical lock with the versatility of electronic control via smartphone, RFID tag or keypad.

KEY POINTS

Opening occurs with the aid of a motor or the "Single Action" quick release and closing occurs through motorised action controlled by a next-generation microprocessor. In case of lack of power supply the operation of the deadbolt is guaranteed by the traditional movement of keys, equipped with a security system that is able to disconnect motorisation during operation of the mechanical cylinder.

Locks of the x1R Smart series are interchangeable with the most common mechanical locks as they use the same mechanical accessories. The electronic accessories' "plug and play" electrical connections make installation extremely easy.

The system is managed through Iseo Argo, an app available on iOS and Android which you can use to connect your smartphone via Bluetooth

4.0 LE and manage all functions.

It can be interfaced with the Iseo access control platform or a third-party system through opto-isolated Input/Output connections which can be used to control the operation modes and states for opening and closing. By using the lockbus connection with proprietary protocol it is possible to have a direct and secure connection with the Iseo range devices.

All models are available with different projections and bolt centre-to-centre distances for a vast interchangeability with mechanical versions. Escutcheons are available in various finishes.

Thanks to the solidity of the mechanical structure it is classified at the maximum grade (7) for anti-intrusion protection (EN12209).

The Credential reader Stylos Smart of ISEO Zero1 product range can be easily rekeyed with a Bluetooth Smart Ready phone: cards, tags or phones can be intuitively added or deleted using Argo, the ISEO smartphone application running on iOS or Android.

KEY POINTS

Stylos Smart is a Multistandard ISO 14443 A/B Credential reader.

The readers can be provided in two versions:

- for indoors
- for outdoors (IP66).

ISEO locks with Lockbus interface, such as the Thesis 2.0 dropbolt, can be directly connected to credential readers without external actuators. They can also manage double accesses with interlock functions and signal lights.

The electronic actuator allows a direct control of electromechanical locks and electric strikers or, by using the built-in relay, of any other access control device such as car park bars, sliding doors, electric locks and so on.

The Stylos Smart Line is provided with a self-adjusting power supply from 8Vdc to 30Vdc ensuring top flexibility and allowing in most cases the use of an existing supply even when the theoretical parameters are deteriorated.

Stylos Smart has connectivity to Bluetooth Smart Ready devices without any plugin to be installed neither on the reader nor on the smartphone.

It can be opened by RFID cards and Bluetooth Smart Ready phones (iOS and Android).

Lost or stolen keys can be quickly deleted with Argo, an intuitive smartphone application available for:

- iOS from iPhone 4S with iOS 7
- Android from version 4.3 (Jelly Bean) featuring Bluetooth Smart Ready hardware
