ARCHITECTURAL CABINETWARE

2024/25

ABOUT GD RUTTER

G D Rutter Ltd was founded in 1930 by George Daniel Rutter, as an importing agent specialising in builder's hardware. Three generations and 93 years later G D Rutter Ltd has grown to be one of New Zealand's leading suppliers of door and cabinet hardware to the hardware trade under the Sylvan brand name.

Throughout the 93 years of business there has always been a strong family influence with the emphasis on customer satisfaction and product quality. Now G D Rutter Ltd is managed by the 3 grandsons of George Daniel, who have grown up with hardware products and being involved in the business from a very young age. This early involvement in hardware products has ensured that the leadership of G D Rutter Ltd has strong

product and technical knowledge together with superior customer service, these qualities set our company apart from many other hardware suppliers in New Zealand.

Designing and sourcing products that suit your environment is a key aspect of the Sylvan brand. Our design and engineering team puts a great deal of effort into ensuring the products we supply meet New Zealand's building standards and their intended purpose.

Our range of hardware products are available from all leading hardware stores, throughout New Zealand. Don't hesitate to contact us if you have any queries regarding any product within the Sylvan range.

CARING FOR THE FINISH OF YOUR HANDLES:

- The plated finishes of polished brass, gold, black, black nickel plate, are all classified as soft finishes.
- It is essential that no cleaning products are sprayed onto items that have a black finish as cleaning products will damage the finish.
- Polished Brass and Stainless steel Sylvan products do require a little bit of TLC from the homeowner, to ensure the finish remains in it's purchased condition. Sea salt, dust, oil from hands and environmental conditions can cause specs or discolouration to the surface. It is essential that these surfaces are cleaned regularly (every 3 months) with a soft cloth and mild soapy water. Or for Stainless steel products use a stainless steel cleaner and lanolin to protect its surface.
