

Cavity Sliding Flush Pull Passage Kit

Installation Instructions

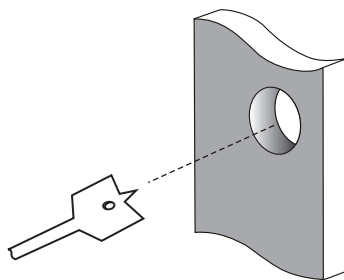

1

Scribe required drilling centres using template below.

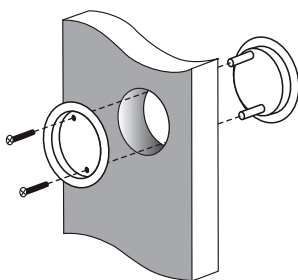

2

Drill 54mm hole through door.

3

Secure inside plate to outside plate using screws supplied.

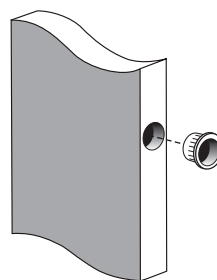

4

Fit door edge finger pull.

Locate a position approximately 150mm above Flush Pull and drill 25mm hole with spade bit.

Press in finger pull. (For stronger fit, use builders glue).
